## SCAVENGER HUNT

---

Name:

email:

Add me to the PERK + Sno-King Watershed Council email lists: yes / no

I found/visited and took a photo of (find at least 9 for a prize):

Swamp Creek      Wild raspberry      Beaver lodge      Snowberry

Salmon      Lake Washington      Storm drain

Big leaf maple      Snag      Douglas fir      Western red cedar

From National Geographic: A **watershed** is an area of land that drains or “sheds” water into a specific waterbody. Every body of water has a watershed. Watersheds drain rainfall and snowmelt into streams and rivers. These smaller bodies of water flow into larger ones, including lakes, bays, and oceans. Gravity helps to guide the path that water takes across the landscape.

Not all rain or snow that falls on a watershed flows out in this way. Some seeps into the ground. It goes into underground reservoirs called aquifers. Other precipitation ends up on hard surfaces such as roads and parking lots, from which it may enter storm drains that feed into streams.

My scavenger hunt finds are important for a healthy watershed because:

I posted my pictures on (which social media platform):
